Ring Road, Ashram Chowk, New Delhi – 110014

Abstract

Traditionally, the Quebec dairy industry has always been protected under the law - guaranteeing a stable income to milk producers by restricting the production of milk to meet domestic demands, setting prices, and limiting imports. The present Article discusses the impact of free trade agreements, specifically, NAFTA 2.0 on this industry - as it threatens the supply management system on which Quebec dairy farmers depend for their livelihood because the United States and other trading partners demand access to the Canadian dairy market in exchange for access to their markets by Canadian manufacturers and service providers.

About the Author

Kenneth Holland earned a Ph.D. in Political Science from the University of Chicago and master's degree in Government from the University of Virginia. He is a Professor at O. P. Jindal Global University in Sonapat and President Emeritus of the American University of Afghanistan. He is the former President of the Association for Canadian Studies in the United States. A scholar of U.S.-Canada relations and the law governing international trade, Dr. Holland is the author of eight books and more than 70 academic articles and book chapters.
